-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

A request for continued examination under 37 CFR 1.114 was filed in this application after a decision by the Board of Patent Appeals and Interferences, but before the filing of a Notice of Appeal to the Court of Appeals for the Federal Circuit or the commencement of a civil action. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on June 29, 2007 has been entered.

Claims 8-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Adams et al. (6,099,497). Adams et al., in figure 9, disclose the steps of providing a stent 64, 74 having a first section and a second section, mounting the stent on a catheter having two balloons 24, 26, wherein the balloons are positioned side by side, advancing the catheter and stent through the vascular system to a position proximal of the bifurcation, positioning the stent so that the second section is aligned with the opening to the side branch vessel, inflating the balloons to radially expand the stent so that the first section apposes and contacts the main vessel proximal of the bifurcation and the second section apposes and contacts the opening of the side branch vessel and deflating the balloons and

withdrawing the catheter. Adams et al., in figure 9, fail to disclose the two balloons as having different lengths (i.e. a "long balloon" and a "short balloon"). However, Adams et al., in figure 17, teach that the balloons should have different lengths, apparently in order to obtain the advantage of facilitating easy passage through the vasculature. It would have been obvious to make the balloons in the embodiment of figure 9 have different lengths so that this embodiment too would have this advantage.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Thaler whose telephone number is (571) 272-4704. The examiner can normally be reached Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhtuan T. Nguyen can be reached on (571) 272-4963. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
